Biosecurity

Which disease matches this type of transmission?

**Vector**

- Soremouth
- Rabies
- Toxoplasmosis
- Ringworm
- Bluetongue

Correct
You selected the correct response.

Incorrect
The correct answer is: Bluetongue.

Can you identify routes of infection? Check the terms that are the 5 routes of infection.

- Rabies
- Breaks in skin
- Mucous membranes
- Vector
- Inhalation
- Ingestion
- Foetal
- In utero
- Indirect Contact

Correct
You selected the correct response.

Incorrect
You did not select the correct answer: breaks in skin, in utero, inhalation, ingestion, and mucous membranes.

Can you identify routes of infection? Check the terms that are the 5 routes of infection.

- Foetal
- In utero
- Indirect Contact
Means of transmission

Listen to each term to hear its pronunciation. Then tab through the list to hear its disease story.

Bat bite (Rabies)
Delivery truck (PED)
Contact with abscess (CL)
Kittens in grain (Toxoplasmosis)
Shared brush (Ringworm)
Rats in feed (Leptospirosis)
Biting flies (Bluetongue)
Afterbirth (Scrapie)

Correct Choice

Bat bite (Rabies)
Delivery truck (PED)
Contact with abscess (CL)
Kittens in grain (Toxoplasmosis)
Shared brush (Ringworm)
Rats in feed (Leptospirosis)
Biting flies (Bluetongue)
Afterbirth (Scrapie)
Biosecurity Learning Module

Which diseases are transmitted through indirect contact?

Correct
- Bat bite (Rabies)
- Rats in feed (Leptospirosis)
- Biting flies (Bluetongue)
- Afterbirth (Scrapie)

Incorrect
- Bat bite (Rabies)
- Rats in feed (Leptospirosis)
- Biting flies (Bluetongue)
- Afterbirth (Scrapie)
